

Anthropological Survey of India

NEW LETTER

January-December, 2017

73rd Foundation Day Celebration 73वें स्थापना दिवस समारोह

ANTHROPOLOGICAL SURVEY OF INDIA
(MINISTRY OF CULTURE, GOVT. OF INDIA)
KOLKATA

On Inaugural Function of the 73rd Foundation Day (on dias from Right to Left : Prof. Ranjit Kumar Bhattacharya, Dr. Kumkum Srivastava, Prof. D.K. Bhattacharya, Prof. Vinay Kumar Srivastava, Dr. Satyabrata Chakrabarti, Dr. Debabrata Mondol, Dr. Kakali Chakrabarty, Dr. M. Sasikumar)

FROM THE DIRECTOR'S DESK

Dear Readers,

The relationship of development with sustainability is an important area of debate and research. The conclusions pertaining to this fall on a continuum, one end of which submits that modern development is perilous to communities that have been sustaining for millennia. The other end speaks of the possibility of having sustainable development, where development builds up the future of the community, ameliorates its quality of life, and pervades, so to say, an 'aura of happiness'.

What is the reality at the local level? Which discourses are crystallizing? Are there contestations between them? What is more important - the goals of development or the people? To provide an answer to these questions, and several others concerned with the relationship between development and sustainability, we have initiated an intensive field study of sixteen social locations. Their comparative study will illuminate the dynamics of development. Anthropology speaks of the differential impacts of development, which vary according to the social categories of gender, age and stratum. Furthermore, the physically and mentally challenged people experience development differently in comparison to those who are not.

Among the academic activities of the year was a national seminar on cultural pluralism, which substantiated the idea that diversity has survival fitness. With remorse, the impact of 'uneven', 'unplanned', and 'mindless' development on biodiversity was noted in the seminar. The trend towards 'mono-ism' is dangerous, for it is irreversible and antithetical to the enduring existence of the planet. Today's aphorism is: 'I survive because all survive, therefore the survival of all should be guaranteed'.

The Anthropological Survey of India was founded as an independent academic and research organization on 1 December 1945. On the Foundation Day this year, we listened to Professor D.K. Bhattacharya of the University of Delhi, outlining the merits of an integrated approach to the study of human beings and their relationship with the wider world, both physical and biological. It devastated us when in the last week of December, we heard of his sad demise, twenty-three days after he had delivered his Foundation Day Speech. After Professor Bhattacharya had read out his speech, he handed over the hand written manuscript to me, keeping with him none of its copies and also not asking for its photocopy, as anyone would have normally done, thereby symbolizing his break with what he had so far done, so that he could inaugurate a set of new ideas!

Vinay Kumar Srivastava
Director

RESEARCH UPDATE

Development and Sustainability

Although the steam engines have now found place in the twentieth century's fables and novels, cloudy smokes had later scripted several ballads on the advancements of human societies. Metaphors of a progressive society have been changing ever with the perspective since eighteenth century's industrial revolution. And in due course of time, paradigms of understanding a civilization from a binary horizontal plane of either the 'old world' or the 'new world' have shifted in stratifying human civilization into notions of 'developed', 'underdeveloped' and 'undeveloped' nations. Very soon the momentum of surplus-based economy has turned around as the most important apparatus in understanding a progressive nation and its society across the world. Henceforth continuous processes of economic reformation have raised various analogical debates in inquiring objectivity and subjectivity of various development policies/strategies on the backdrop of sustenance of life. Indian scenario is not exceptional.

In view of the above, the Anthropological Survey of India has taken over a national project entitled "Development and Sustainability" during 2017-2018, with objectives to delineate three perceptible narratives on development, those may

respectively be termed the narratives of the state, community, and the civil society. The contentions of each of these are juxtaposed in an anthropological enquiry. Initially we have selected 16 locations from various parts of the country for the present study. Each of the locations has its own geographical uniqueness and phenomenal characteristics of experiencing magnitude as well as the outcome of the development processes/initiatives. Impressions of reconnoiter study amongst a few of those locations are presented below:

Tourism in Goa

Tourism is the largest non-machinery based industry in the state of Goa for years. It generates maximum states' revenue steadily, directly and passively from tourism activities. In such backdrop, the study of tourism and development processes in Goa is an important domain of research under this project. The study was conducted to have a comprehensive understanding on the emergence of Goa as an international tourism hotspot from a legacy of a traditional Portuguese colonial ruling of more than 451 years and the role of tourism in sustaining the livelihood of a large population of the state. The fieldwork was carried out in two phases in the coastal belt of North Goa, especially

Candolim Beach an ideal destination for a relaxing weekend

Calangute-Candolim belt. A fifteen days reconnoitre in September 2017 was followed by a month long fieldwork in the peak tourism season, i.e. November and December 2017. The study revealed that though the tourism business initially was a seasonal activity, now the business continues throughout the year, except the shacks and water sports business during monsoon.

It was observed that though most of the investment in tourism is done by the local inhabitants, who have the proprietorship but the business is also carried on by the migrant population coming from the states of Rajasthan, Gujarat, Jammu and Kashmir, Orissa, West Bengal, Bihar, Jharkhand, Eastern part of the Uttar Pradesh, Arunachal Pradesh, Manipur, Nagaland and Orissa. A large number of migrants are from Karnataka and have engaged themselves in the beach-related activities, like shack worker, beach masseurs, petty sellers and water sports.

Study showed that a continuous conflict is simmering among the stakeholders surrounding the issues on tourism activities. People have expressed concern that the aggressive tourism development has destroyed the environment and ecology, the mangroves, sand dunes, destroyed the paddy fields which in future will be a concern for the future generation. The Cyclone Ockhali which hit the Coastal belts of Goa was an eye opener. Many shacks on the beach were destroyed. The businesses in many tourist spots were badly hit due to the upsurge of high tide.

Potters in a Town Setting of Barwani

The fieldwork was carried out among the Prajapati, an artisan community of a small town called Barwani, in district Barwani, Madhya Pradesh. The Prajapati is also known as Gole. They are widely known for their traditional occupation of pottery making and they are popularly known as Kumhar in that area. This study was an attempt in understanding the intricacy of development and sustainability of age old practices in the context

At artisan's workshop

of urban influence. It has been observed despite having sufficient intangible cultural resources, pottery as primary occupation was confined among a few households. The reason is that the raw material for pottery was not easily available in surrounding, rather every essential item had to be purchased. This could be directly related to urbanization and various infrastructure development initiatives. Such a situation has threatened the continuation of pottery as a primary occupation and has led them to adopt different occupations.

Roghia Village with Apple Orchard

A team of anthropologists from the North-West Regional Centre of the Survey conducted fieldwork in village Roghi of Kinnaur district in Himachal Pradesh. It was observed that the apple orchard brought about marked changes in the economic as well social lives of the villagers. The people are happy with the

Kinnauri lady engaged in sheering wool at Roghi

existing development measures as they have come out of several earlier difficulties in different spheres of the life. According to them, access to school and hospital and improvement in transportation facilities have made their life easier compared to earlier situations. It has been found that despite its remoteness, the villagers are pretty aware of the government schemes in order to commercialize the agro-based industry as a primary source of sustainable livelihood measures.

Rubber Plantation Villages of Tripura

Rubber production in Tripura is primarily governed by the Rubber Board, a statutory body constituted by the Government of India under the Rubber Act 1947, with a vision to create a new avenue for income generation as well as boosting-up revenue generation for the industrially undeveloped state. In 1963, the rubber plantation programme was introduced in this state on a trial basis as a soil conservation method by the forest department. Owing to the vision, the Rubber Board of Tripura started its journey in mid-1978, and had achieved impressive

Crop field of a village near to Rubber plantation

progress through strategic interventions for the expansion of plantation area, production and productivity, thus making Tripura the second large rubber producing state in India after Kerala. Later in 1983, TFDPC (Tripura Forest Development and Plantation Corporation) had also started some group plantation projects in West and South districts of Tripura. In 1988, TRPC initiated plantation with a vision of rehabilitating the tribal people on the basis of implementing the rubber plantation in Tripura.

Against this backdrop, a team of scholars carried out a study in some villages of Sepahijala district of Tripura and observed enthusiastic community participation in rubber plantation based economy. It was reported that prior to the introduction of rubber plantation, insurgency and ethnic conflicts were very common that had been stabilized with the scope of income generation in those remote areas through rubber plantation programme. It was also reported by various Government agencies in initial days that plantation programme was challenged by strong resistance from the villagers. With a gradual progress of time, plantation has proved to be a successful programme in the tribal areas of Tripura. Earlier the Tripuri, Jamatia and Halam earned sustenance from the Jhum fields of hilly terrain, who have now engaged in horticulture, and primarily in rubber plantation.

Sustainability in the Majuli Island

Majuli, believed to be the largest inhabited river island in the world, presently the only river island district in the country, is situated in the mid-stream of the river Brahmaputra in Assam. The present study was carried out in one village of Majuli, named Kamalabari Sattra, comprising seven hamlets, that lies on the northern bank of Brahmaputra. The village has a population of Mishings only, living in pile dwellings that are raised on both the sides of Alipath (embankment) in a linear alignment. Casual wage labour is the main occupation of the villagers, since they do not own land, neither for the homestead nor for cultivation. Male members do earn livelihood mostly from construction work, carpentry, office establishment as casual laborers, while the females explore possibilities of earning wages from agricultural fields. Besides this, weaving is the most popular activity, carried out by women of almost every household in a traditional manner.

Traditionally the people of this island have depended on the age-old practice of authority structure where the power vests in the Gaon Bura (headman), who holds power and privilege hereditarily. The Mishings of this Island continue practicing their own religious customs. However, the traditional religion of the Mishings of the Majuli came under the influence of the Neo-

Struggle for existence- life in Majuli in flood

Vaishnavism of Srimanta Sankaradeva and his disciples in the 16th century and onwards, thus led them to form the institution of *satra* (monastery) at the places of the island with establishment of *nama ghar* (prayer halls) at the micro levels. The institution of *sattra* plays an important role in guiding socio-cultural practices in Majuli. The people who have been living here for centuries together, even embracing all odds because of several displacements overtime, are sustaining life on a strong foundation of ethnic solidarity. Emergence of Neo-Vaishnavism has added new dimensions in continuing religious and cultural legacy in the island situation of the Majuli.

Bhatin-a Tribal Village of Mine Core

Focusing on the objectives of the said project, a study was carried out at Bhatin, a tribal dominated village of the Potka Block of the East Singhbhum district of Jharkhand. East Singhbhum is one of the mineral rich as well as industrially exposed districts of the country. Moreover, huge uranium deposit has provided this district with one of the prominent landmarks of country while formulating national non-conventional energy policies which otherwise take place on the desk. Bhatin is located at Jadugoda, adjacent to uranium mines of the Uranium Corporation of India Limited (UCIL). This village is multi-ethnic and the villagers are distributed in the main village and its eight *tolas* (hamlets) such as Jhahira Ghutu, Baro Ghutu, Baro Basti, Ulidih, Sasho Ghutu, Saro Ghutu, Panjaha Koncha, Fadna Dungri and Chati Kocha. The total population of the village is 2000 persons, comprising 1017 males and 983 females (2011 Census).

In Bhatin, agriculture is the primary source of earning livelihood. Wage labour in the ancillary units of the uranium mines provides subsistence to some extent. Interestingly only 4.47% of the studied people are directly engaged in UCIL. Notwithstanding one primary school and one middle school at the village, literacy rate of this village was found only 63.67% as compared to 66.41% of Jharkhand state (2011 Census). Presence of the UCIL headquarters and employee's colony at Jadugoda, if it could not

Sukha Shakhu-Pale Saltrees in Sacrade Grove at Bhatin

improve the literacy rate, it has at least made them more conscious about the environmental impact of mine activities in day-to-day life.

DNA Polymorphism in Contemporary Indian Populations

YSNPs markers of 71 tribal communities and the mt-DNA haplotypes of 48 communities have also been identified for the first time in India through this study, which has its own significance in the Genomics Study of People of India. Final report on the 'Genomic Diversity of the People of India' has been submitted and the editing of the report is in progress. In addition, sequencing of a mt-DNA of few more tribal communities has been executed in the DNA-laboratory.

Community Genetics and Health (Human Genetics Extension Programme)

During this year, altogether seven genetic screening-cum-awareness camps were organized among different tribal dominated areas where abnormal haemoglobin disorders like sickle-cell anemia and thalassaemia are prevalent.

Physical Growth and Development of the Children of North-East India

A team of research personnel had carried out the first phase of fieldwork among the children of two villages, namely Barsigitlim and Dobasipara of the West Garo Hills District, Meghalaya.

Anthropometric measurements among students of West Garo Hills District

EVENTS

Capacity building

Workshop-cum-Training Programme on Wooden Mask Making among the Mech of the Alipurduar District, West Bengal

The Eastern Regional Centre of Anthropological Survey of India, Kolkata, organized a workshop-cum-training programme among the Mech community of the Madhya Nararthali, a village under the Kumar Gram block of Alipurduar district of West Bengal on their traditional craft of 'Wooden Mask Making' from 17th to 31st January, 2017.

The Mech is one of the Scheduled Tribes, belonging to Bodoland-Kachari ethnic group. The Mech trace their migration into India through Patkoi Hills between India and Myanmar and they gradually distributed to Assam and Northern part of West Bengal. Etymologically, their community name is derived from the river Mechi of Terai region. However, they are now-a-days advocating ethnic identity as Bodo rather than as Mech. Despite re-establishing ethnic identity, their expertise in making wooden masks has enriched the mask tradition of West Bengal.

Perseverant artisan- making of wooden mask

Mask making school among the Mech is the outcome of an oral tradition based on the folk-drama-Gumrinati's Pala, where each character of the pala requires adorning themselves in specific masks. All those masks are made of Gamher wood (*Gmelina arborea sp.*). Mask making is solely a male domain. Unfortunately, age-old mask making tradition of Mech is close to extinction for various reasons. A workshop-cum-training programme was organized among them with an aim to revamp that craft tradition

as well as oral tradition among the youth, even as a popular art object to make it more economically viable.

Workshop-cum-Training Programme on Traditional Weaving among the Mech of Alipurduar District, West Bengal

A Workshop-cum-Training Programme on traditional weaving among the Mech community of Purba Nararthali village of Alipurduar district was organized by the Eastern Regional Centre of Anthropological Survey of India, Kolkata from 21st to 31st January, 2017. Altogether fifteen female members participated in this training programme. Training was offered by two experts from their own community.

Aronai (scarf)- an aesthetic signature of Mech weaving tradition

Like many other ethnic groups of North-East India, weaving carries immense cultural significance among Mech. Yesteryears, skilful weaving was recognized as a compulsory artwork in bride selection among them. Mech ladies also have expertise in sericulture. Silk worm, particularly *endi* or *eri* and the feed plants that is wild castor are grown as hedge plants. Collection of yarn from cocoons and weaving colourful silk clothes with marvellous motifs through bamboo and wooden structured loom (*kanti*) exemplifies unique aesthetic sense. Under the shadow of surplus economy, once need based weaving tradition is now in peril. Years old craftsmanship is now pushed to the corner by readymade powerloom wears. Organizing that workshop-cum-training programme was a humble attempt in rejuvenating weaving tradition among the Mech.

In that community participation programme, women were trained in selection and collection of raw materials, treatment of threads, arraying and weaving. Ethnic dresses like *dokhna* (female wear), *aronai* (scarf), *khot gosla* (jacket) and *guncha* were woven with great enthusiasm.

Workshop-cum-Exhibition on Tribal Healers and Tribal Medicine

In order to document and disseminate tribal knowledge of healing system, the Southern Regional Centre, Mysore, organized a National Workshop-cum-Exhibition on "Tribal Healers and Tribal Medicine" in collaboration with the Indira Gandhi Rastriya Manav Sangrahalaya, Bhopal, from 4th to 8th February 2017 at Mysuru. The said programme was inaugurated by Prof. Sarit Kumar Chaudhuri, Director, Indira Gandhi Rastriya Manav Sangrahalaya, Bhopal, on 4th February, 2017 and as the Chief Guest of the inaugural function, Prof. P. K. Mishra, graced the occasion. Tribal healers of Valmiki and Yanadi (Andhra Pradesh), Munda (Jharkhand), Kota and Kurumba (Tamil Nadu), Bhotia (Uttarakhand), Gond, Baiga and Pradhan (Madhya Pradesh and Chattisgarh), Kunbi (Karnataka), Kurichan, Mullu Kuruman, Paniya (Kerala) participated in the workshop.

Anthropologists among the Traditional Medicinemen

Workshop-cum-Training Programme on Traditional Dance and Music of the Oraon

The Ranchi Field Station of the Anthropological Survey of India organized a Workshop-cum-Training programme on "Traditional Dance and Music of Oraon Tribe" at Bajpur village under Ratn Block of Ranchi, Jharkhand, from 13th to 17th June, 2017. The Oraon of Jharkhand are a prominent tribal group which has a rich music tradition in forms of dance and music. However, in recent times those are forgotten heritage, due to lack of encouragement as well as impact of widely popular music of greater tradition. The young generation is reluctant in continuing. On such occasion we must refer to the case of Andaman & Nicobar Island, where we find many of their community members sincerely practicing traditional dance and music through many troops of youth, even in very remote locations.

The purpose of the workshop was to revive ethno-music tradition of the Oraon, in view of the changing scenario of the tribal villages in general. Altogether twenty individuals (six males and fourteen females) were trained for five consecutive days under the guidance of three gurus of their own community. The actual forms of Karma dance, Sohrai dance, Domkatch, Jhumar dance and Jadur dance were demonstrated among the participants with elaboration of myth and meaning of postures, rhythms, musical instruments and lyrics with their cultural relevance.

Trainer, trainees and rhythmic tribal music

Five days long workshop not only could help in reviving intangible heritage of Oraon ethno-music, but also it helped in rebuilding cultural ethos between trainer and trainee through *guru-shishya parampara*. In addition, the training programme brought back the true spirit of Akhara (traditional dancing ground) and Dhumkuriya (youth dormitory) again in the Bajpur village. Workshop was concluded with a performance of the trainee, thus receiving applauded acceptance of our endeavour.

Health Awareness Programmes

- In order to understand nutritional status, morbidity states and prevalence of various types of abnormal haemoglobins among human societies, we organized a series of "Health Awareness-cum-Screening" camps in 2017, among various tribal communities of different locations in the country.
- In collaboration with the Directorate of Health Services, in Andaman and Nicobar Islands, a two-days long camp was organized among the Nicobarese of Champion village of the Nancowry Island of the Andaman and Nicobar Islands from 31st January to 2nd February, 2017.
- A team of research personnel organized an exhibition on "Community Genetics & Health" from 23rd January to 30th

January, 2017 in the 10th Sundarban Lokopriya Utsav at Sonakhali village of 24 Parganas (South) of West Bengal.

- The Survey organized a "Thalassaemia Awareness and Screening Camp" on 1st March, 2017 at the Barisha Sashibhushan Janakalyan Boy's High School in collaboration with the Inner Wheel Club of Calcutta Old City.
- Another "Health Awareness-cum-Screening Camp" was organized among the tribal villagers of Shatosa, of Bastar district, Chhattisgarh, from 17th to 19th August, 2017.
- "Health Awareness camp for screening genetic disorder among the Bodh Scheduled Tribe Community of Himachal Pradesh" was organized from 10th to 15th October 2017 in Lahaul-Spiti and Kullu of the Himachal Pradesh.

DOCUMENTATION AND DISSEMINATION

AUDIO-VISUAL MAPPING OF CULTURE OF INDIA

Ajrakh of Khavda

Ajrakh is derived from Arabic word "azrak", which means "blue". Precisely Ajrakh refers to 'block printing' on cloths, using natural dyes. It is one of the ancient textile traditions in parts of Gujarat and Rajasthan and in Sindh of Pakistan. Antiquity of this tradition evidently refers to one of the prestigious as well as highly demanded items of Indus valley, exported to Egypt and Babylon through maritime trade in that period. The people of Sindh have a deep reverence for Ajrakh. Ajrakh occupies an important place in all significant events of the life cycle rituals. Moreover, culturally it is more than a piece of cloth. It symbolizes honour and greeting. In Sindh culture, guests are welcomed with Ajrakh, on occasions of cultural events and gatherings. In Gujarat, Khavda of Bhuj tehsil (Katchchh district) is one of a few prominent centres of Ajrakh. The Khatri community has been engaged in this craft for centuries and the technique has been transformed for several generations.

Ajrakh is a 2.5-3 meters long rectangular piece of manual wooden block printed cotton cloth put together from two strips of narrow cotton cloth. It can be two types: *ek-puri* (single-side printing) and *bi-puri* (printed on both side) of the fabric for multi-purpose use like turban, shawl, bed-sheet, hammock for babies and the cover of bullock cart. Traditional Ajrakh involves various stages of dyeing and resist printing using natural dyes. The resist and some colours are printed on the cloth using carved wooden blocks. These blocks are finely engraved with intricate symmetric, geometrical patterns so that the same block can be used for both sides of the cloth. Those geometrical shapes are synchronization of concentric circles with lines. Popular motifs of Ajrakh are *kakkar*, *ghaleechho*, *chowkadibadam*, *butta*, *minkudi*, *riyal*, *kharek*, *sitara*, etc.

Making of Ajrakh block printing

Processing of Ajrakh is laborious and time-consuming, involving a series of several stages of printing and dying methods, like *saaj*, *kasano*, *khariyanu*, *kat*, *gach*, *rang* and *vichharnu*, etc., for finishing of the work. Traditional craft of Ajrakh uses only natural colours. Usual colours are red, yellow, blue and black. However, green and some other secondary colours are also in use now-a-days. They are generally made by mixing of basic colours. Colours are extracted from various sources. Water soluble paste of *gondh* (gum), *chuna* (lime), *mitti* (mud) applies for outline printing (*kiryana*) of block's design. A paste of *gurh* (jaggery), *bajri ki atta* and iron scraps solution (iron scraps soaked in water) is major source of black outline (*kul*) printing. Where red colour block printing (*karikh*) is required, colour is supported by a paste of alum, *gondh* (gum), *mitti* (mud) and grinded tamarind seeds powder. Solution of *indigofera* plant powder, soda, *gurh* (jaggery), *chuna* is the only source of durable indigo dying. For attaining yellow colour, paste of pomegranate peel, turmeric powder, *taiyesu* flower petals is mainly used. For the white portions of the design, a resist paste is prepared with gum and lime. A mixture of mazist, alizar and masak is generally used for the reddish maroon colour during printing.

Dola Yatra of Harirajpur

Dola Yatra is a very important festival in Puri District, which is also called Dola Melana. Harirajpur Melan is famous for its colourful cracker works. Harirajpur is a small village. It is the Block/Tehasil of Delanga, under Puri district, Orissa. Its nearest town is Jatani (Khurda Road) which is 2 km. away from Harirajpur. Harirajpur is devoted to Lord Somanath (Shiva). In the month of March-April after the 5th day of *Dola Yatra*, associate deities gather in the *melan ground* for a special worship. This is known as *Panchudola melan*. The Holi celebrations at Harirajpur have been taking place since the 17th Century.

Devotees of Panchu Dola Melana

The mythological significance of Holi as Dola Utsav is outlined in a number of Puranas and ancient Sanskrit texts. The festival is celebrated with considerable fanfare in many villages. Harirajpur deserves a special attention for various reasons. The Panchudola Melana on the Jatni-Pipli road is unique. Customarily, before the commencement of the annual fair, the presiding deity of the village, Paschimasambhu Somnath Dev, invites deities of the neighbouring villages to Harirajpur. Panchudola means five dolas/five *veemans*. The main five *dolas* are (i) Paschimeswar from Harirajpur village; (ii) Kedareswar from village Uttarbasti; (iii) Nilakanthaswar from the village Naibhasar, (iv) Balukeswar from the village Kantia, and (v) Gopiswar from Kusumati village.

There are a number of Shiva temples present in the nearby villages where Lord Shiva is worshipped in different names. During dola purnima, the rituals are followed and the symbolic deities of the lords are carried by locals on their shoulders and finally to the ground (*melanapadia*). They are placed on the

deemarked alters. This is called *melana*, which means the get together of the Lords. People put colours on the deities to offer prayers and also play Holi with them. The *melanas* are observed in different villages out of which this (Harirajpur melana) is the biggest. 108 *veemans* used to come to the Harirajpur ground from 108 temples. This year only 77 *veemanas* came to this *melana*, several villages have discontinued this practice. The *Veemana* is decorated with various kinds of traditional religious appliqué craftwork of Pipili, such as *Veemana/Dola Mandani* (Covering for celestial vehicle), *Chhati* (ritual umbrella), *Trasa* (banner), *Alata* (hand-fan for religious use) and the *Chandua* (canopy). The Paschimasambhu Somnath Dev procession is led by drummers, pipers and *sankirtana mandalis* - a group of devotees who play music. The processions from neighbouring villages halt in front of each household at Harirajpur and the villagers offer *bhoga* to the deities. This ritual is called *chachery*. The idols brought from the other villages are greeted with offerings at the entrance of the Harirajpur *Melana* ground and the celebrations culminate in a unique ritual called *Hari-har bhet*.

On the 1st day of the festival, all the dolas are placed in the *Panchudolapadia*. These are carried by the milkman community and are well decorated with appliqué work. Fifty percent of dolas are with Lord Shiva and Parbati and the other fifty per cent are with Radha and Krishna. On the 2nd and 3rd days, people offer Abir to the deity which comes from different villages. In this festival, people forget their enmity, bitterness and hatred. They come together to renew their friendship and bonding. According to their age-old experience, the pond adjoining the Paschimasambhu Somnath Dev temple is believed to have miraculous power. Devotees suffering from fatal diseases take a dip in the pond and, therefore, the fair witnesses thousands of devotees taking dips in the pond every year. It is also believed that the presiding deity fulfils the desires of devotees who, in gratitude and exhilaration, burn firecrackers when the idol of Paschimasambhu Somnath Dev is taken in a procession to the fair ground. The ritual signifies the victory of good over evil. Besides, it is widely believed that one who dies in and around the *melana padia* during the four-day annual event attains salvation.

SENG KUT SNEM

The North-Eastern Regional Centre of the Anthropological Survey of India, Shillong, participated in the SENG KUT SNEM, which was held on 23rd November as a Revered Day of the Khasi at Jaiaw, which is situated about 10 km. from Shillong. On 23rd November of 1899, the Khasi people, equally blessed as other races by the Almighty, brought out 16 magnanimous young men who stood up and led the community against the oppression of the British. This was the beginning of a movement for preserving and conserving the uniqueness of Khasi culture. That movement would always be remembered as the Seng Khasi Movement. The 23rd November is penned down in history a

Ka Seng Kut Snem to commemorate the renaissance and awakening of the Khasi Community.

SENG KUT SNEM- Celebration at Jaiaw, Shillong

PARAMPARA

Spurred by the belief that only knowledge can create demand and therefore sustenance, Parampara was conceived as a dissemination and promotion of folk and tribal arts and artists. The Eastern Regional Centre of the Survey, Salt Lake, had organized a cultural programme and exhibition "Parampara- Indigenous and Folk Festival, 2017" on 16th and 17th February, 2017 at the Ashutosh Birth Centenary Hall, Indian Museum. The two-days' long cultural meet was inaugurated by the

renowned theatre personality, Shri Bibhas Chakrabarty, and the stage set fire with spectacular performances by various tribal and folk troops from West Bengal and North-East India.

Memorial Tradition of Bastar

Scholars of the Sub-Regional Centre of this Survey, Jagdalpur, vividly documented the memorial traditions of Bastar.

Temple Festival of Nellipira

The Southern Regional Centre, Mysuru, undertook the documentation of the Kattunayakan (PVTG) temple festival at Nellipira, Nilgiris District of Tamil Nadu on 27th April and 28th April, 2017.

Kattunayakan tribal priest performing 'oracle' during a temple festivity in Nellipira, Nilgiris, Tamil Nadu

Troop from Mizoram performing Chero (Bamboo Dance) in Parampara- Indigenous and Folk Festival- 2017

EXHIBITION

During 2017, the Survey organized a series of exhibitions in several parts of the country, which are given below:

- The Central Regional Centre of this Survey participated in the 6th Science Expo organized by Raman Science Centre and Planetarium, Nagpur, from 18th to 22nd January, 2017, and organized an exhibition on "Eutherian Mammals to Man, the Story of Human Evolution".
- A mega exhibition on the "People of India" in connection with the exhibition on "Food and Technology Expo and Concurrent Show Govt. achievements and Schemes Expo" was displayed at Pragati Maidan, New Delhi, from 14th to 16th July 2017.

"People of India" in Pragati Maidan, New Delhi

- The Survey participated in the "Indian National Exhibition-Cum-Fair 2017", which was held at Garia, Kolkata from 17th to 20th August, 2017, and in another exhibition "21st National Exhibition" at New Barrackpore, Kolkata from 24th to 27th August, 2017.

SEMINAR

- Focusing on the bio-cultural aspects of the Scheduled Tribal communities in India and the significance of various tribal development programmes/schemes of Government agencies, the Western Regional Centre, Udaipur, organised a National Seminar entitled "Government and Tribal Development: Approaches, Role and Reality" from 18th January to 20th January, 2017 in a grand manner. Prof. K. K. Misra, Vice Chancellor, Utkal University of Culture, Orissa, was the Chief Guest of the seminar. Keynote address was delivered by Prof. Rajat Kanti Das, UGC Emeritus Professor, Vidyasagar University, West Bengal. Besides presentation of research papers, the seminar also initiated a panel discussion on "Empowering Scheduled Tribes with special reference to PVTG: Role of Government and Beyond", which was chaired Prof. K. K. Basa, Utkal University. Three days' long seminar was concluded with the valedictory address, delivered by Prof. Vinay Kumar Srivastava of Delhi University.

Releasing of Seminar Abstract on "Government and Tribal Development: Approaches, Role and Reality"

- Two days' long National Seminar on "Biosphere Reserves and Protected Areas in India: Man-Nature Interface" was organized under the auspices of the Headquarter of the Anthropological Survey of India, Kolkata, from 9th to 10th March, 2017 at Salt Lake City, Kolkata. The main objective was to bring different stakeholders on a single platform to discuss the man-nature interface in detail. The seminar was inaugurated in a befitting manner. Shri Ajay Kumar Naik, IFS, APCCF & Regional Director, Forest Survey of India, Kolkata was invited as the Chief Guest of the Seminar. Dr. Kalyan Rudra, Director, Pollution Control Board, West Bengal, graced the gathering as the Guest of Honour. Keynote address at the seminar was delivered by Prof. Prodyut Bhattacharya, Guru Govind Singh Indraprastha University, New Delhi. Scholars, experts across the nation participated in the seminar and presented their thoughtful

Dr. Arun Kumar Singh, Former Senior Ecologist narrating the Role of Anthropological Survey in Biosphere Reserve Study

research notes on empirical and conceptual aspects, covering emerging issues on the management and conservation of 18 Biosphere Reserves and the other Protected Areas of the country. Two days' long academic sessions were concluded with valedictory notes addressed by Dr. S.B. Chakraborty, General Secretary, Asiatic Society, Kolkata, and Prof. K.C. Malhotra on 10th March, 2017.

- The North-Eastern Regional Centre, Shillong, of the Anthropological Survey of India organized a National Seminar on "Anthropological Researches in North East India: Colonial and Post Colonial Dimensions" from 26th ■ 28th July, 2017. Prof. Henry Lamin, Pro-Vice Chancellor,

North-Eastern Hill University, Shillong, inaugurated the national seminar as the Chief Guest. Prof. Sarit K. Chaudhuri, Director, Indira Gandhi Rashtriya Manav Sangrahalaya, Bhopal, delivered the keynote address; and Prof. Sheikh Rahim Mandal, Former Director, Centre for Himalayan Studies, North Bengal University, West Bengal, delivered the valedictory address.

Inaugural session of the Seminar "Anthropological Researches in North East India"

- The positivism of August Comte got a new dimension from the studies of Durkheim, when the latter started reviewing social facts on the basis of collective consciousness. This country has been experiencing self-determining issues; restructuring historical facts of congressions; increasing cases of suicide en-route from farmers' fields to classrooms and even extends to drawing rooms, towards virtual appeal/intoxication, gradual increasing of overwhelming neo-nationalist approaches towards redefining motivation and integration of society under one canon cannot be isolated from realities. In such a backdrop, the Eastern Regional Centre, Salt Lake of the Anthropological Survey of India paid homage to Emile Durkheim on his 100th death anniversary. On this occasion a day-long academic exercise was carried out under title "Passages through Collective Consciousness: Homage to Emile Durkheim" on 19th November, 2017 to look upon the issues and review the relevance of Durkeimian thoughts empirically, in understanding the praxis of social facts and processes in

Inauguration of the Seminar on "Passages through Collective Consciousness: Homage to Emile Durkheim"

contemporary situation. The said academic meet gathered participation of noted scholars from various disciplines of social sciences.

- Praxis of understanding 'Unity in Diversity' in India shifted from the realm of metaphysical subjectivity to rational objectivity from the era when India finally got annexed to the Victorian rule. In order to have a contextual understanding of "Unity in Diversity" in India through experience, the Eastern Regional Centre of the Anthropological Survey of India organized a National Seminar on "Discourses on Diversity, Identity and Integrity: Multi-disciplinary Approaches towards Indian Society" from 6th December to 8th December, 2017 at Kolkata. Inaugural session of the seminar was graced by Prof. Yogesh Atal, as the Chief Guest and Prof. Vineetha Menon as the Guest of Honour. Keynote address at the seminar was delivered by Dr. Ramesh Chandra, Former Deputy Director of this Regional Centre. Three days' long academic sessions were concluded with valedictory session with mesmerizing deliberations of Prof. Arun Kumar Chakrabarty, Director General, Raja Rammohun Library Foundation, Kolkata; Dr. S.B. Chakraborty, General Secretary, Asiatic Society, Kolkata; and Prof. Vinay Kumar Srivastava, Director, Anthropological Survey of India.

Prof. Vinay Kumar Srivastava addressing in the Inaugural session of "Discourses on Diversity, Identity and Integrity: Multi-disciplinary Approaches towards India Society"

- The Sub-Regional Centre, Jagdalpur of the Anthropological Survey of India, organized a three day workshop-cum-seminar from 21st December, 2017 to 23rd December, 2017 in the tribal world of the Bastar, Chhattisgarh, on the theme "Tribal World of Verrier Elwin". The main objective of the workshop was to highlight the life and works of Verrier Elwin, one of the great anthropologists in India. As homage to the great contribution of Verrier Elwin in understanding the tribal universe of Bastar, foundation stone was laid to establish a library and museum at the Binjli Village of Narayanpur of Bastar, where Verrier Elwin spent a remarkable period of his time during his close association with Bastar tribes. That even had created a mesmerizing ambience while Verrier Elwin was being recapitulated through the narratives of Shri Ashok Elwin, son of Verrier

Elwin and some villagers set their journeys down the memory lane with that charismatic personality. Homage to Verrier Elwin had reached a height with inauguration of a two-days' long National Seminar on "Tribal World of Verrier Elwin" by Prof. Shailendra Kumar Singh, Vice Chancellor,

Inauguration of the Seminar on "Tribal World of Verrier Elwin"

Bastar University, in presence of the academic excellence of Prof. Vinay Kumar Srivastava, Director of the Anthropological Survey of India, Prof. Ranjit Kumar Bhattacharya, Former Director of the Survey, and Dr. Jayanta Kumar Sarkar, Former Director-in-Charge of this organization, and tribal experts from various parts of the country, who engaged in discussing the dimensions of pioneer works of Verrier Elwin in depth.
